

Intro to Printmaking Supply List

- Carving tools

Recommendations for linocut tools:

- Flexcut (good) and Palm Handled Carving Tools from Woodcraft (better).
- A good beginner selection would include a small and a large u-gouge, a small v-gouge, a knife for outlining and a wide gouge for large areas. This combination will work for both linocuts and woodcuts.

- Paper

Choose single sheets of paper. Rice paper is good for relief printing but you will want to experiment also.

Heavy watercolor paper (4001b) is best for the collagraph prints. We will discuss paper the first night so you may just want to bring rice paper that night.
